

**AGREED RECORD OF FISHERIES CONSULTATIONS BETWEEN THE UNITED
KINGDOM AND THE FAROE ISLANDS FOR 2025**

14 MARCH 2025

1. A Delegation from the United Kingdom, headed initially by Colin Faulkner, and subsequently by Catherine Perez, and a Delegation from the Faroe Islands, headed by Herluf Sigvaldsson, met in London and by means of videoconference on a number of occasions to consult on mutual fisheries relations for 2025. A list of participants is attached in Annex 4.
2. The Delegations recalled the Framework Agreement on Fisheries between the Government of the Faroe Islands and the Government of the United Kingdom of Great Britain and Northern Ireland signed in Copenhagen on 29 October 2020 ("the Framework Agreement"). They recalled the principles which underpin their close cooperation as set out in Article 1 of that agreement. They further recalled their close cooperation in 2024 in international fisheries forums, including Regional Fisheries Management Organisations, and looked forward to continuing their dialogue on the management of shared stocks in 2025.
3. The Delegations recalled the Agreed Record of Fisheries Consultations between the Faroe Islands and the United Kingdom on the management of mackerel in the North-East Atlantic which they had signed on 17 June 2024 alongside the Agreed Record of Fisheries Consultations between the Faroe Islands, Norway and the United Kingdom on the management of mackerel in the North-East Atlantic. They welcomed the consequential and much-needed reduction in fishing pressure on the stock as compared to 2021, 2022 and 2023. They committed themselves to playing their part in 2025 in reaching a comprehensive quota-sharing arrangement for the stock.
4. The Delegations decided to recommend to their respective authorities the fishery arrangements for 2025 as outlined in this Agreed Record, including Annex 1.
5. In this Agreed Record, references to a "Party" are references to the United Kingdom and the Faroe Islands as Contracting Parties to the Framework Agreement, and references to the waters of a Party are references to the Parties' respective areas of fisheries jurisdiction as defined in Article 2(3) of the Framework Agreement.
6. The Delegations reiterated their determination to cooperate, in their mutual interest, in securing continued responsible fisheries and ensuring the long-term conservation and sustainable use of marine living resources.
7. The Delegations restated the importance of cooperating on scientific research with regards to marine biology and the marine environment.
8. The Delegations decided to meet during 2025 and as part of an annual intersessional process, to ensure the successful implementation of this Agreed Record and to deepen the strategic relationship between the Parties.

9. EXCHANGE OF OPPORTUNITIES

- 9.1 The Delegations decided to exchange quotas for a number of stocks, as set out in Annex 1.
- 9.2 The Delegations decided that the Faroe Islands may request a quota review meeting once they have fished at least 90% of the UK's initial haddock transfer of 200 tonnes.
- 9.3 The Delegations decided that, if requested by the Faroe Islands no later than 15 June 2025, the Parties will reconvene to discuss an additional transfer of up to 1,800 tonnes of haddock in UK waters to the Faroe Islands (bringing the total transfer to 2,000 tonnes), and commensurate further transfers of stocks in Faroese waters to the UK.
- 9.4 The Delegations noted that the transfer of haddock, ling and tusk from the UK was to be fished by longline or jigreeel vessels only. The Delegations further noted that this transfer was made with the intention that no more than four Faroese vessels will target these stocks in UK waters of ICES area 4 at any one time. This does not limit the total number of vessels that may target the quota over the course of the year. The Delegations decided to review and discuss this further as part of the annual intersessional process.

10. MONITORING, CONTROL AND SURVEILLANCE

- 10.1 The Delegations recognised the importance of cooperation in regard to the monitoring, control and surveillance measures that are stipulated in the Technical Annexes to this Agreed Record as set out in Annex 5. They acknowledged that there are significant benefits for both sides in sharing relevant information and intelligence and in enhancing co-operation in areas of mutual interest.
- 10.2 The Delegations decided to strive to meet as required during 2025 to discuss relevant topics and evaluate the cooperation regarding the Special Area.
- 10.3 The Delegations noted the good cooperation this year in implementing the relevant technical arrangements that apply to vessels fishing in the waters of the other Party, as set out in the Technical Annexes. They further decided that, as those measures have shown themselves to be effective during 2024, only minimal revision was required for the 2025 Technical Annex. The Delegations agreed to publish the 2025 Technical Annexes in a separate document alongside this Agreed Record.
- 10.4 The Delegations agreed to establish a joint Compliance Forum within the framework of their bilateral arrangements on Monitoring, Control and Surveillance. The Compliance Forum would be tasked with strengthening those bilateral arrangements and with facilitating joint efforts on relevant issues, such as strategic and operational risk-management (risk-assessment, risk handling and evaluation) and information-sharing. The Delegations agreed that members of the forum should work together closely to ensure that the incidental by-catch of non-target species in UK waters was minimised to the greatest extent possible. The forum should intend to meet in person or virtually once in 2025 and consider if this meeting can be scheduled alongside other meetings to best utilise resources. The forum should provide to the Delegations an update on its work including any potential policy proposals on Monitoring, Control and Surveillance measures well in advance of their bilateral consultations for 2026.

- 10.5 The UK Delegation shared information with the Faroe Islands Delegation about the implementation of Remote Electronic Monitoring (REM) on pelagic vessels in the UK. Any relevant pelagic vessels fishing in Scottish waters will be required to have REM installed and operational from 7 March 2026 and will be required to undergo a system test trip when authorised in writing by the Scottish Government. System test trips will be available to take place from 7 September 2025. The Delegations agreed to continue the fruitful dialogue which has existed between them to date on this subject to ensure timely and successful implementation of this legislation.

11. ELECTRONIC DATA EXCHANGE

- 11.1 The Delegations noted the decision by the North-East Atlantic Fisheries Commission (NEAFC) to implement and set into production the new Electronic Reporting System (ERS) based on the United Nations Fisheries Language for Universal Exchange (UN/FLUX standard) on 15 January 2024. This date marked the start of the two-year transition period wherein the remaining Contracting Parties shall test and implement the new ERS data exchange system based on the UN/FLUX standard.
- 11.2 The Delegations noted that the bilateral agreements on the exchange of electronic vessel positions data between the Faroese and the UK have not yet been completed to facilitate the exchange of data based on UN/FLUX Standard.
- 11.3 The Delegations noted that Vessel Position data is exchanged between Faroese and UK Fisheries Monitoring Centres and that work will continue in 2025 to progress exchanging this via (UN/FLUX Standard).
- 11.4 The Delegations agreed to commit to exploring the options available to them to exchange Fishing Activity data electronically via (UN/FLUX Standard).
- 11.5 The Delegations agreed that there should be a meeting before the 2025 Intersessional where technical experts can discuss ways to facilitate the electronic exchange of data. This should allow for a potential work plan to be produced prior to the annual consultations for 2026.

12. CATCH INFORMATION

- 12.1 The Delegations reviewed the final catch data for 2024 as set out in Annex 2 and final catch data for 2023 as set out in Annex 3. They decided to work together in 2025 to monitor and further develop their relevant catch information data exchange processes.
- 12.2 For 2025, the Delegations decided that an intersessional meeting would consider data to date on the catch composition of each Party's fleet fishing in the other's waters. The Delegations decided to share per set or haul catch data, at a kg-per-species-caught level of detail, at least five working days before the intersessional meeting, and provide any updates to this data immediately before the meeting.

13. SCIENTIFIC COOPERATION

- 13.1 The Delegations decided that the UK and the Faroe Islands would continue to co-operate on scientific matters of mutual interest related to commercially exploited fish stocks and

their associated ecosystems. The species and stocks of interest include pelagic, demersal and deep-sea stocks.

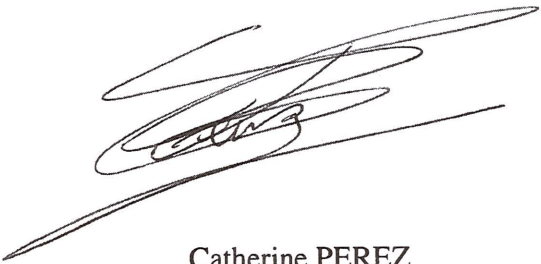

14. NEW LEGISLATION AND TECHNICAL MEASURES

- 14.1 The Delegations decided to communicate in a timely manner the introduction of new fisheries legislation and technical measures recognising, in particular, the need to provide such information in an expeditious manner to fishers from both Parties.
- 14.2 The UK Delegation provided updates with respect to the Scottish Government's policy consultation on offshore Marine Protected Areas, highlighting the management measures likely to come into effect in UK waters in 2025. The Delegations agreed to continue their ongoing dialogue, where appropriate, as the consideration of proposed measures continues in 2025.

EXCHANGE OF STOCKS FOR 2025

SPECIES	ICES AREA	STOCKS IN UK WATERS FOR TRANSFER TO FAROE (TONNES)	STOCKS IN FAROESE WATERS FOR TRANSFER TO UK (TONNES)
Greenland Halibut	2a, 4, 5b, 6	700	-
Bycatch stock	2a, 4, 5b, 6	70 ¹	-
Cod	NAFO 3M	0	-
Cod	NAFO 3L	19	-
Horse Mackerel	6, 7	0	-
Hake	-	0	-
Saithe	-	0	-
Haddock	4	200 (2,000) ^{2,3}	-
Ling	4	100 ²	-
Tusk	4	25 ²	-
Bycatch stock	4	50 ⁴	-
Cod (West of Scotland)	6a	5 ⁵	-
Pollack	6	2 ⁶	-
Blue Ling (Western)	6, 7	250	-
North Sea Autumn Spawning Herring	4	0	-

¹ Miscellaneous species exclusively for bycatch in Greenland halibut fisheries, excluding catches of species of which the UK has transferred quota to the Faroe Islands. Catches of these stocks should be counted against the relevant quota. All species caught must be entered into the elog.

² Targeted fishery by longline or jigreeel only.

³ To increase up to the bracketed amount if so decided by the UK and Faroe Islands at a review meeting in accordance with paragraphs 9.2-9.3 of this Agreed Record. If the quota is increased, there will also be a commensurate quota increase for transfer to the UK.

⁴ Miscellaneous species exclusively for bycatch in North Sea fisheries, excluding catches of species of which the UK has transferred quota to the Faroe Islands. Catches of these stocks should be counted against the relevant quota. All species caught must be entered into the elog.

⁵ Exclusively for bycatch purposes in the western blue ling fishery.

⁶ Bycatch only.

SPECIES	ICES AREA	STOCKS IN UK WATERS FOR TRANSFER TO FAROES (TONNES)	STOCKS IN FAROESE WATERS FOR TRANSFER TO UK (TONNES)
Cod and Haddock	5b ⁷	-	880 ⁸
Saithe	5b	-	575
Redfish	5b	-	10
Blue Ling and Ling	5b	-	160
Flatfish	5b	-	40
Other Species	5b	-	425
Atlanto-Scandian Herring	Faroese Waters North of 62° N	-	0
Mackerel	Faroese Waters	-	0

⁷ Excluding the Faroe Bank area that was previously closed to UK vessels before 2023.

⁸ Of which no more than 264 tonnes may consist of cod, and as bycatch only. No directed fisheries for cod are permitted under this quota.

ANNEX 2

FINAL CATCH DATA FOR EXCHANGE OF STOCKS FOR 2024

FAROES LANDINGS OF QUOTA TRANSFERRED FROM UK (TONNES)

SPECIES	ICES	AREA QUOTA	LANDINGS
Greenland Halibut	2a, 4, 5b, 6	850	432
Bycatch stock	2a, 4, 5b, 6	50	27
